

Topaz Signature pad options

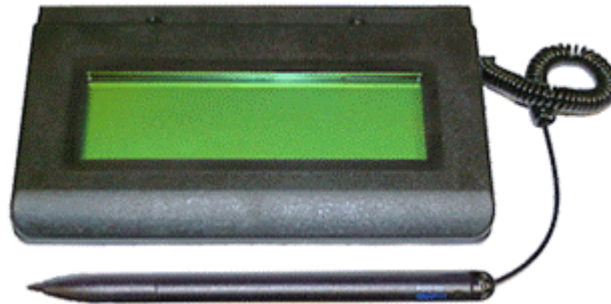

SignatureGem™ 1x5 Model Z-T-S261-HSB

The Topaz Model T-S261 is rugged and portable. The small size and convenient design of the tablet feature internal pen storage, angled writing surface, and non-skid feet. The tablet can be hot-plugged into the computer and need not be connected during the "boot" process. The PenGem™ pen utilizes interchangeable plastic-tip or inking cartridges. With the inking cartridge, you can offer signed paper records to your customer while instantly storing the signature within your document file as your "paper-less" copy. Tablet MTBF is 1,000,000 hours and the unit has survived being run over by a truck. The pen batteries offer a lifetime of 250,000 signatures, and along with the pen tip are easily replaceable with no dis-assembly required.

The pad and pen have a 3 yr warranty. MSRP - \$230 ea.

SignatureGem™ LCD 1x5 Model Z-T-L462-HSB

The Topaz Model T-L462 is a complete and versatile pen-input system with interactive LCD display. The advantage of a Topaz LCD tablet is the ability to capture a digital signature with the ease and familiarity of ink-on-paper by use of "electronic ink" displayed under the pen tip as a user signs. The large signing area and small size of the LCD 1x5 make it a great tool for capturing signatures in any environment where portability or space are at a premium. The active electromagnetic pen is designed for a long life of over 30 million tip activation cycles, is tethered to the tablet to prevent misplacement, and when not in use can be kept in attached storage module. Should the plastic pen tip need replacement, it can be removed and a new tip installed without any dis-assembly required.

The pad and pen have a 3 yr warranty. MSRP - \$365 ea.

SigLite™ Model Z-T-S460-HSB

The Topaz SigLite series of electronic signature capture tablets are designed to provide the benefits of electronic signatures in a controlled environment where cost is a significant issue. The SigLite is a simplified no-frills signature pad that retains the high resolution, accuracy, and data rate of the SignatureGem series of tablets but with a lower-cost touchpad interface.

The pad has a 1 yr warranty. MSRP - \$98 ea.

SigLite™ LCD Model Z-T-L460-HSB

The Topaz SigLite series of electronic signature capture tablets are designed to provide the benefits of electronic signatures in a controlled environment where cost is a significant issue. The SigLite LCD is an LCD version of the simplified no-frills SigLite pad that retains the high resolution, accuracy, and data rate of the SignatureGem series of tablets but with a lower-cost touchpad interface. The LCD display shows "electronic ink" under the pen tip as the user signs.

The pad has a 1 yr warranty. MSRP - \$250 ea.
